

KRAMER HOMEOPATHIC

To: _____

Date: _____

Dear friend:

Homeopathic medicine is a worldwide medical therapeutic which treats the whole individual by establishing a gentle and lasting cure through the use of homeopathic remedies derived from natural substances. The use of these remedies stimulates the individual's life force, which in turn, strengthens the weaknesses in the body's immune system. In this specific and scientific manner, the body can heal itself from within.

To clarify the nature of our practice, please understand that we are not medical doctors and, as such, we do not diagnose disease, nor prescribe medication.

As homeopathic consultants, we begin treatment with an individual by taking a comprehensive case history, which may initially take up to two (2) hours. Through this in-depth investigation of all physical, mental and emotional symptoms, we can then compile a "picture" of the individual as a whole person. The totality of symptoms will point to the various weaknesses in the fabric of wellbeing. From this picture, we can then recommend a course of homeopathic treatment, which will stimulate the entire organism and reestablish balance and health.

Your signature indicates that you understand the work we are doing together and that you are now actively assuming responsibility for your total health and wellbeing by following the recommended course of treatment.

Yours in health and healing,

Your signature/Legal Guardian
